Livestock Facility Biosecurity

Biosecurity is a set of preventative measures designed to reduce the risks for introduction and transmission of an infectious disease agent. The Iowa State Fair decontaminates and disinfects facilities used for livestock events. All cleaning and disinfection will be carried out so as to minimize or prevent the possible movement of diseases and pests on and off the fairgrounds premises. Disinfection will be carried out prior to every livestock event following the thorough cleaning of the previous event. The disinfectant product will be professionally applied by a company specializing in disease control in livestock facilities. Any participant in any livestock show that attempts to move into a facility before it has been properly disinfected; takes full responsibility for any and all disease that an animal may be exposed to, as well as any consequences that may lead to. The Iowa State Fair will to the best of our ability not allow entrance to any of our facilities until properly cleaned and disinfected.
